

E-COMMERCE SALES & BUSINESS PERFORMANCE ANALYSIS

Microsoft Excel - Data Analytics Portfolio Project

An end-to-end analysis of 10,000 e-commerce orders covering sales, profit, customers, products, monthly trends, geography, marketing channels and returns.

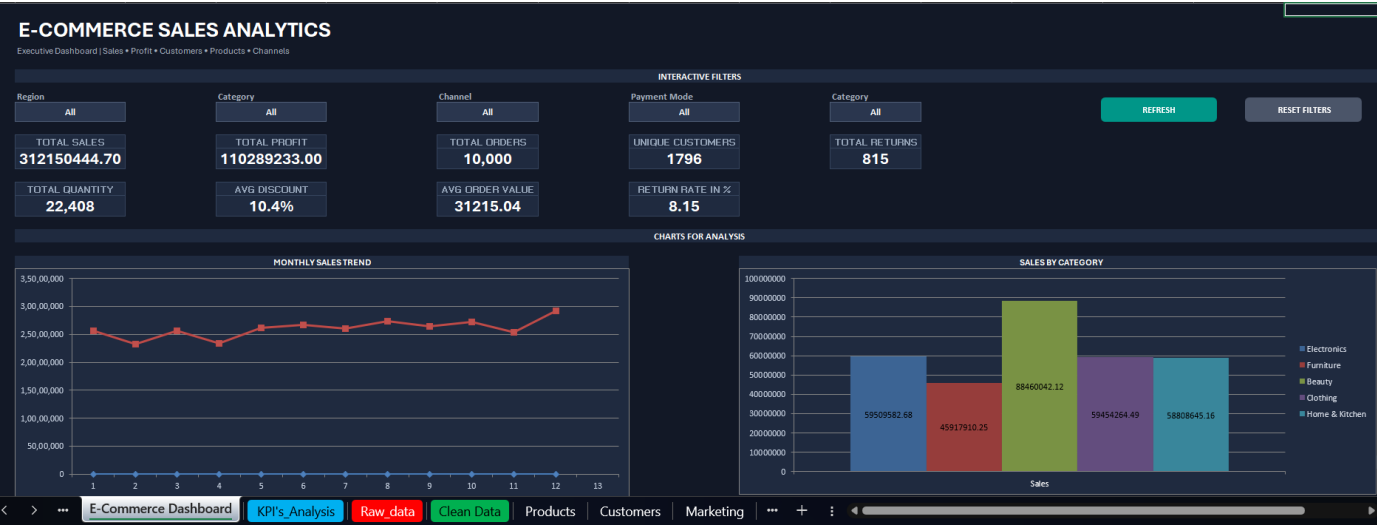

TOTAL SALES	TOTAL PROFIT	TOTAL ORDERS	UNIQUE CUSTOMERS
INR 312.15M	INR 110.29M	10,000	1,796
QUANTITY SOLD	AVG ORDER VALUE	TOTAL RETURNS	RETURN RATE
22,408	INR 31.2K	815	8.15%

Project Objective

Transform raw transactional data into a structured analytical workbook and interactive executive dashboard, then use the results to understand revenue, profitability, customer activity, product performance, regional performance, marketing efficiency and returns.

Interactive Dashboard - Executive View

The dashboard combines interactive filters with headline KPIs and high-level sales visuals, giving decision-makers a fast view of business performance.

Dashboard screenshot: KPI cards, interactive filters, monthly sales trend and category sales.

Interactive Dashboard - Analytical Charts

The second dashboard view expands the visual analysis to monthly sales, category sales, regional profit and channel sales.

Dashboard screenshot: monthly trend, category performance, profit by region and sales by channel.

Analysis Performed

Analysis Area	Business Questions Addressed
Sales	How are revenue, profit, orders, quantity and category margins performing?
Time	How do sales and profit change month to month, and what is the MoM growth trend?
Customers	How do 1,796 unique customers differ by orders, spending, AOV and recency?
Products	Which of the 120 products generate the most sales, profit and margin?
Geography	Which regions lead or lag in orders, revenue, profit and profitability?
Marketing	Which channels drive customers, revenue and profit, and which deliver the best ROI?
Returns	What patterns exist across 815 returns by reason, product, category, region and financial value?

Excel & Data Analytics Skills

Data Cleaning | XLOOKUP | SUMIFS | COUNTIFS | IF / IFERROR | UNIQUE | FILTER | Excel Tables | Pivot Tables | Charts | KPI Development | Dashboard Design | Data Visualization | MoM Analysis | Profit Margin Analysis | Marketing ROI

Key Business Insights

Category Performance	Beauty was the leading category by both revenue and profit.
Regional Performance	North was the strongest region by sales and profit.
Marketing Revenue	Website generated the highest revenue among the analyzed marketing channels.
Marketing Efficiency	Email delivered the highest marketing ROI, showing that the highest-revenue channel is not always the most efficient.
Product Profitability	Product analysis demonstrated why sales volume should be assessed together with profit and margin.
Time Trends	Monthly analysis and MoM growth helped reveal changes in business performance over time.
Returns	815 returns from 10,000 orders produced an overall return rate of 8.15%, making returns an important operational KPI.

Project Outcome

Built an end-to-end Excel analytics portfolio project that moves from raw data cleaning and transformation to KPI creation, multi-dimensional analysis, visualization and an interactive executive dashboard. The project demonstrates practical Excel and business-analysis skills relevant to an entry-level Data Analyst role.
